

**Pelletterie 2F** manufactures leather, synthetic, and natural fabric belts for Mens' and Ladies' at its sole production site, in Cividino di Castelli Calepio (Bergamo, Italy).

Since 1978, the company is devoted to "made in Italy", strictly selecting national raw materials, melting design and passion for quality, with care for health and safety of the people working for the company and for the environment.

In order to give concrete form to its commitment for environmental protection, throughout 2016 Pelletterie 2F has started the implementation of a management system based on ISO14001:2015 standard, by which the management means:

- Control the processes and the equipment in order to comply with the environmental legislation, including directives, regulation applicable to business and products, also considering any requirement applicable in the countries where the products are shipped.
- Comply with environmental issues included in Client's regulatory requirements and with any other requirement expressed by other relevant interested, accepted on a voluntary basis.
- Optimise the consumption/yield of materials (especially the leather), to avoid wastages on the minimum quantity needed.
- Prevent the pollution, by adopting technical solutions intended to reduce negative effects on the environment.
- Limit the energy consumption
- Chose and use products with low environmental impact, complying with customers' requirements.
- Commit to a good practice in the management waste, to ease the treatment by authorized companies.
- Take preventive actions to reduce the risks of environmental emergency (especially fire, spills)
- Increase the awareness of the employees and any external supplier/subcontractor whom part of the processes may be subcontracted to.
- Control the waste management by involving employees, subcontractors accessing the company site for any construction or maintenance work to cooperate on identification, storage, protecting the waste until they are collected for disposal.
- Monitor the work environment to ensure good maintenance of the equipment in order to avoid any lack and spill.

## POLITICA AZIENDALE PER L'AMBIENTE

- Continuously increase the performance of the management system, by adopting corrective actions and instructing the employees to report any opportunity for improvement.

The management is committed to make adequate resources available in order to implement the principles of this environmental policy, shared with the staff and made available on the official website.

The environmental system manager is appointed to provide a copy to anyone requesting it, keeping a distribution log.

All people working under the control of the company shall cooperate to implement such principles by complying with all procedures and instructions stated by the management system to prevent any form of pollution.

This document is submitted to a periodic review by the management, and its implementation level is evaluated by establishing consistent related objectives/topics to be achieved.
